

GAF Geospatial GmbH (GAF), an e-GEOS S.p.A. (Telespazio S.p.A./ASI) company, is a globally active provider of cross-platform geoinformation solutions and innovative Earth Observation applications. In addition to receiving and procuring satellite-based earth observation data, GAF holds a leading position in the areas of data processing and geo-consulting due to its 40 years of expertise. With an international and interdisciplinary team of experts, GAF sets standards for geospatial consulting, cloud- and AI-based data analysis, and satellite-based monitoring of the environment and natural resources in Europe and around the globe.

To strengthen our team and support our software development in implementing security requirements, as well as to actively contribute to the implementation of ISO 27001, we are seeking a dedicated professional to join us at our **headquarters in Munich** at the earliest possible date as an

Information Security Expert

with focus on software development and ISO 27001

Your tasks:

- Further development of our internal security policies and processes
- Conducting risk assessments and deriving appropriate measures
- Consulting on and implementing security related requirements in customer projects — particularly in data provisioning and software development projects
- Supporting ISO 27001 certification process: preparing documentation, accompanying audits, and implementing requirements within the Information Security Management System
- Contributing expert knowledge in the area of *BSI IT Grundschutz* for environments with increased protection needs, as well as ensuring compliance with relevant regulatory requirements
- Training and raising awareness among colleagues on topics such as secure coding, data protection, and information security

Your profile:

- ✓ University degree in Computer Science, Business Informatics, Security Management, or a comparable field
- ✓ Hands on experience in requirements management and supporting security critical software projects (e.g., OWASP, Secure SDLC)
- ✓ At least 5 years of relevant professional experience, including proven involvement in ISO 27001 certification projects (preferably with *BSI IT Grundschutz* exposure)
- ✓ Excellent German and English communication skills, both written and spoken (C1 level according to CEFR)
- ✓ Strong analytical mindset, structured working style, and the ability to communicate complex topics in a clear and accessible way
- ✓ Collaborative team player who enjoys working in interdisciplinary environments
- ✓ Independent, responsible, and results oriented working style — even under time pressure

Desireable knowledge:

- ✓ Experience in implementing BSI IT-Grundschutz for environments with increased protection needs

Our offer:

- Varied and responsible work in an international and interdisciplinary environment at one of Europe's leading geoinformation companies
- Comprehensive support in familiarising yourself with your professional role
- Training and development - because your experience and knowledge count
- A respectful, friendly and modern project working environment in a multi-national team of committed colleagues and a leadership style based on trust
- Flexible working hours and the opportunity to work from home within the framework of our regulations
- Workation: temporary work from abroad depending on individual and legal requirements
- An attractive location with perfect public transport connections and great options for outdoor and recreational activities in the direct vicinity
- A range of additional benefits, e.g., public transport contribution (job ticket), company pension scheme (optional), travel health insurance (worldwide), occupational health management and more

Further information:

Place of work: Headquarters in Munich

Full-time position (40 hours per week)

Permanent position, available to start as soon as possible

Please note: Only applicants with a valid work permit for Germany can be considered

Are you interested in applying for this position?

Then we look forward to receiving your application.
