

GAF Geospatial GmbH (GAF), an e-GEOS S.p.A. (Telespazio S.p.A./ASI) company, is a globally active provider of cross-platform geoinformation solutions and innovative Earth Observation applications. In addition to receiving and procuring satellite-based earth observation data, GAF holds a leading position in the areas of data processing and geo-consulting due to its 40 years of expertise. With an international and interdisciplinary team of experts, GAF sets standards for geospatial consulting, cloud- and AI-based data analysis, and satellite-based monitoring of the environment and natural resources in Europe and around the globe.

To strengthen and support our team at our headquarters in Munich, we are looking for a motivated

Junior Project Manager

in the field of Software Development and Operations

Our team manages complex, multifunctional projects by developing new and leveraging from existing GAF software solutions. In this role, you will be part of the management team of a large collaborative project focused on the development, maintenance, and operation of an automated multi-source satellite data provisioning system in the Earth Observation domain.

Your tasks:

- **Project Coordination:** Support the coordination of an interdisciplinary team of thematic experts and international project partners from various domains (software development, cloud administration, remote sensing, user support, etc.) in line with the project work plan, schedule, quality standards, and budget
- **Service & Incident Management:** Support service performance and incident management to ensure compliance with defined KPIs
- **Process & Workflow Improvement:** Assist in improving operational procedures and software lifecycle processes (DevOps, CI), focusing on efficiency, stability, and security
- **Reporting & Client Interaction:** Support regular communication with the client through technical and formal project meetings, and contribute to project documentation such as minutes, progress reports, and technical deliverables

Your profile:

- ✓ University degree in Geoinformatics, Computer Science, Software Development, Earth Observation/ Geoinformation or a related field
- ✓ Minimum 3 years of professional experience in managing software development projects and operational service environments
- ✓ Strong project management skills, particularly in risk management, stakeholder management and reporting
- ✓ Proven ability to work effectively with international project teams and clients, demonstrating trust-building and clear communication
- ✓ Proficiency in software development methodologies and modern cloud architecture solutions
- ✓ Fluency in English and German (written and spoken, C1 level according to CEFR)
- ✓ Excellent communication skills, both written and verbal
- ✓ Strong analytical skills and solution-oriented mindset
- ✓ Self-motivated and independent working style combined with strong collaboration skills

Desirable knowledge:

- ✓ Familiarity with modern DevOps principles, CI/CD workflows, automation
- ✓ Knowledge of Earth Observation concepts, public and commercial satellite missions, data formats and providers
- ✓ Experience with ESA/EC/Copernicus projects and institutions

Our offer:

- Varied and responsible work in an international and interdisciplinary environment at one of Europe’s leading geoinformation companies
- Comprehensive support in familiarising yourself with your professional role
- Training and development - because your experience and knowledge count
- A respectful, friendly and modern project working environment in a multi-national team of committed colleagues and a leadership style based on trust
- Flexible working hours and the opportunity to work from home within the framework of our regulations
- Workation: temporary work from abroad depending on individual and legal requirements
- An attractive location with perfect public transport connections and great options for outdoor and recreational activities in the direct vicinity
- A range of additional benefits, e.g., public transport contribution (job ticket), company pension scheme (optional), travel health insurance (worldwide), occupational health management and more

Further information:

- Place of work: Headquarters in Munich
- Full-time position (40 hours per week)
- Permanent position, starting at the earliest possible date

Please note: Only applicants with a valid work permit for Germany can be considered.

Are you interested in applying for this position?

Then we look forward to receiving your application via our GAF careers website with any other useful supporting documents, along with your (gross) salary expectations and your earliest possible availability to start.
